

PRINCE ALBERT PROGRESSES

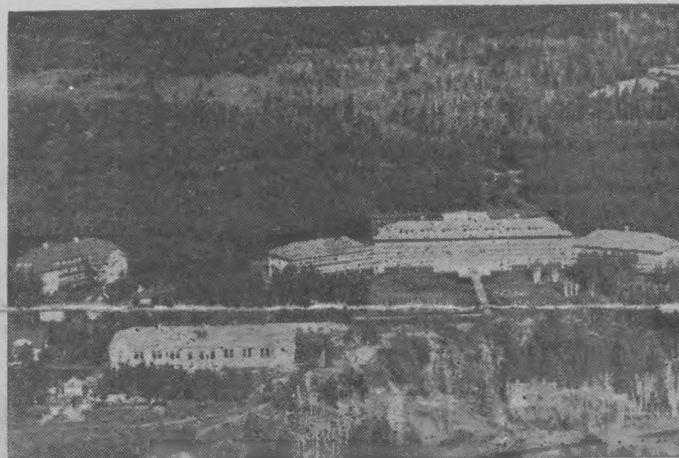

Again in 1938 Prince Albert showed remarkable gains and improvement. Following are some of the developments which took place here during the year:

- 1 A Dam spanning the great North Saskatchewan river was completed in March at a large expenditure for the purpose of increasing the water depth for several miles to assure a safe air harbor for pontoon equipped planes flying out and in from the vast Northland.
- 2 Russell Field, Prince Albert's modern airfield, which adjoins the air harbor, was enlarged to accommodate the largest airplanes.
- 3 Daily Air Service between Prince Albert and Regina connecting with the Trans-Canada Airlines was inaugurated in August.
- 4 The Northern Wood Preservers (Sask.) Ltd. erected a plant in Prince Albert where the vast quantities of Northern Saskatchewan timbers, ties and fence posts will be creosoted.
- 5 The Canada Creosoting Co. Ltd., Plant was also located here in 1938.
- 6 A \$240,000.00 Viaduct was commenced and will be completed this spring over the C.N.R. tracks on Central Avenue.
- 7 An All-Weather Provincial Highway was completed to Montreal Lake, 90 miles north, opening up a new fur, timber and fish area. The Provincial highway from there is now under construction to Lac la Ronge, 180 miles north. This great Northland area which has been accessible only by air is rich in minerals, timber, fish and fur.
- 8 All Weather Provincial Highway completed to sixty miles straight south, tapping a rich farming country.
- 9 All Weather Provincial Highway completed thirty miles due west from Prince Albert to another important farming area.
- 10 Provincial Highway to Nipawin, eighty-five miles east of Prince Albert, brought up to standard and to be completed in 1939.
- 11 The Metropolitan Stores Ltd. erected a large new store in November and the Canada Packers opened a distributing office here in the fall of 1938.

400,000 Fence Posts

The above picture shows part of the new creosoting plant just completed at Prince Albert by the Northern Wood Preservers (Sask.) Limited. The first order received by this plant is for the creosoting of 400,000 fence posts. The posts will be purchased from Northern Saskatchewan farmers. A new source of income for Northern Saskatchewan and a new industry for Prince Albert.

\$1,500,000.00 to Fight T.B.

An aerial view of the Prince Albert T.B. Sanatorium situated among the pines on the north bank of the Saskatchewan river at Prince Albert. Costing over \$1,500,000.00, this large institution is considered one of the most modern in the world today. Another large Prince Albert payroll.

Prince Albert an Important Distributing Centre

As a Distributing Centre Prince Albert is one of the most important in the West. Besides ten railway lines and eight bus lines radiating from this city, it is the base for two airline companies. These companies, The Canadian Airways Ltd. and the M & C Aviation Co. Ltd., operate regular schedules the year round, carrying thousands of passengers and great tonnage of freight

to and from the Northland mineral, fur and fish areas.

Prince Albert has everything in its favor, being so splendidly situated in the northern section of Saskatchewan's best farming area and on the edge of the great Northland where Saskatchewan's vast natural resources are located.
